NFT

COMING SOON

HYPERNODE LAUNCH
HYPERSWAP LAUNCH
NFT TREASURE HUNT
PARTNERSHIP WITH GAME COMPANIES
LISTING ON ALL EXCHANGES

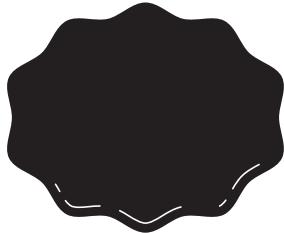

CUBE NFT

Hypernode launch: Hypernode is a bep-20 staking/mining platform which promises 10% daily returns to all stakers.

It supports BUSD, BSC AND MATIC. TBD

Hyperswap Launch: The House of nodes will be launching their very own bep-20 supported swap, liquidity pools will also be made available. We can Now Buy & Sell Hyper tokens in HyperSwap and earn trading dividends in BNB

CUBE NFT

NFT TREASURE HUNT: The house of nodes will be launching a massive nft project that will shake up the crypto world and also the metaverse.

The very first of its kind the node treasure hunt.

Launch of the world first Nft Hunt with Crypto Unlockables worth over \$1,000,000

Partnership with Huge Crypto,Nft and Game Company

We would be going in Partnership with Huge gaming company for the Development Of NODE BUBBIES sandbox where players Earn In game asset for Playing.

CNFTs Listing On All DEX

CNFTs will be listed On all Dex and Exchanges with the price \$0.01/CNFTs At this Stage.

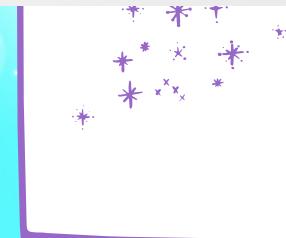

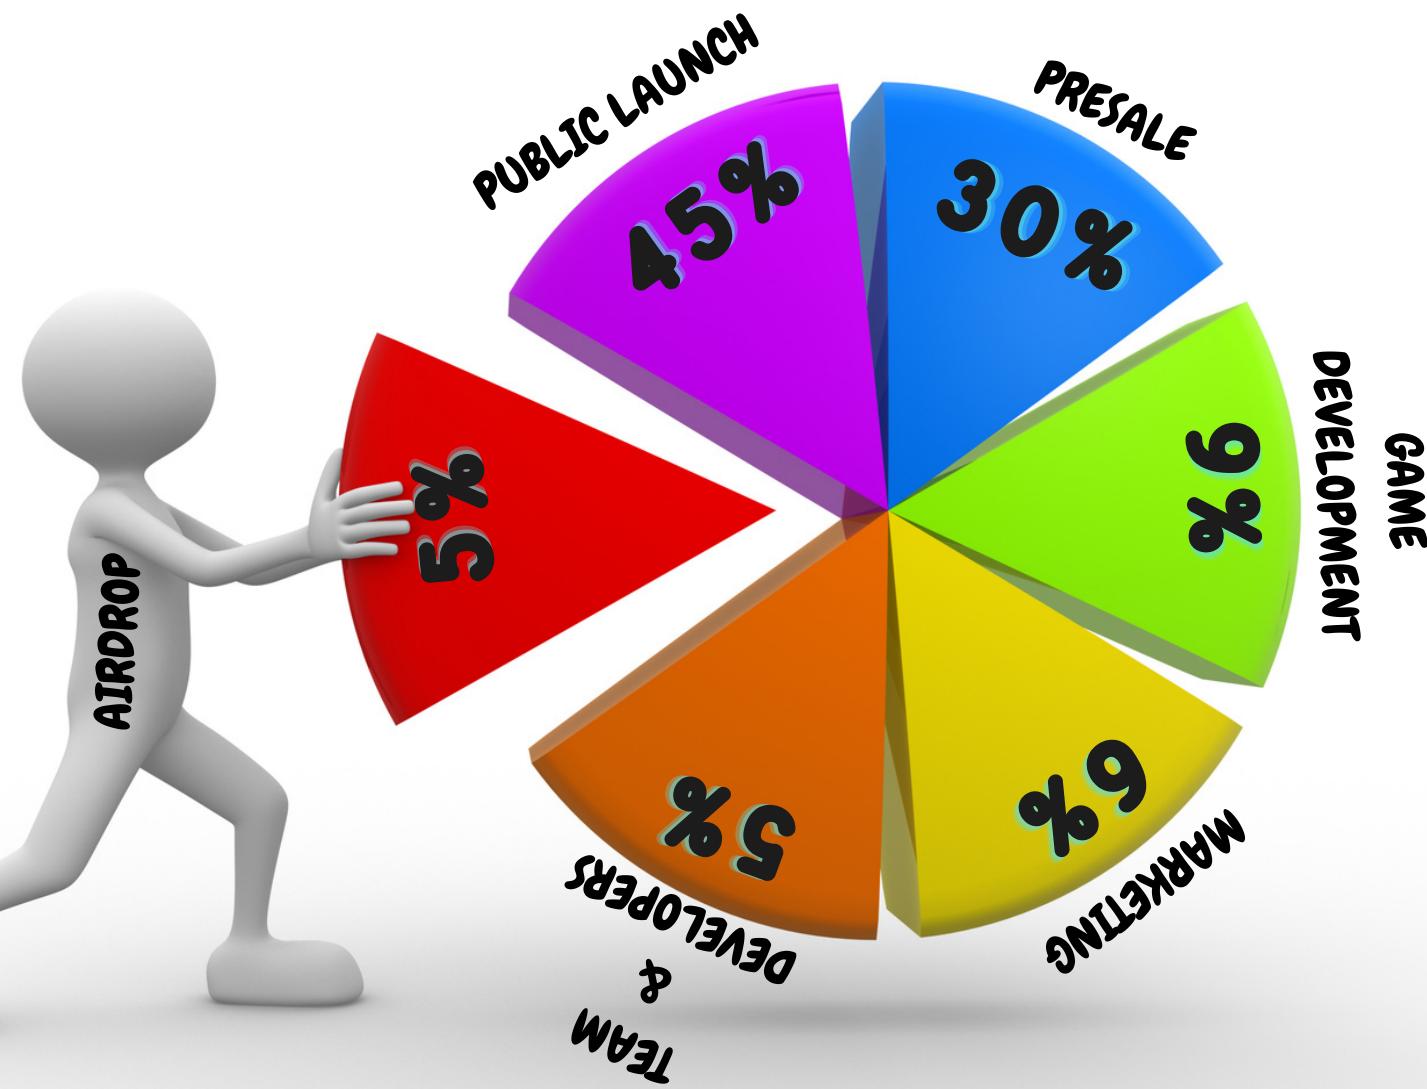

NODE 2

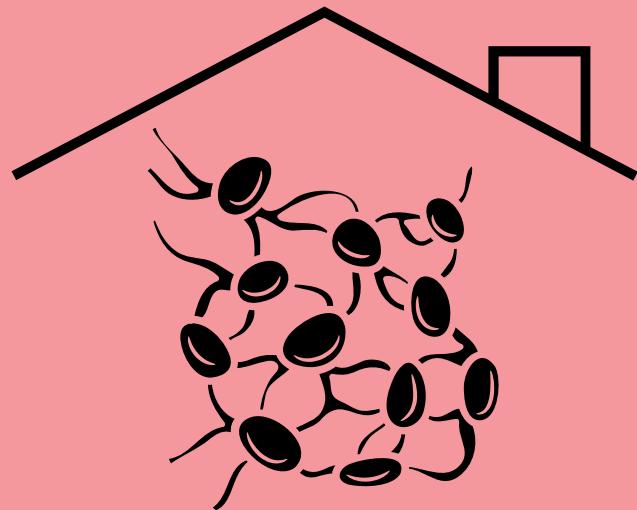

CUBE NFT

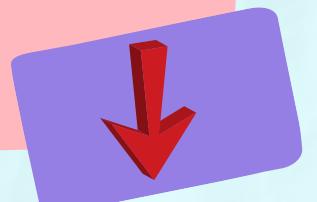

HYPER NODE

MINER

Innovative DeFi on Binance Smart Chain
Upto 15% daily return and 14% referral bonus
Fully Verified and Audited Contract

FREQUENTLY ASKED QUESTIONS

DAILY PERCENTAGE

Daily percentage is up to 15%
This depends on eating habits, the time you Re-connect nodes/RE-invest
or deposit and TVL fluctuation.
Average daily return is 5-15%

NODE PRICE

Nodes do not have a set price.
Higher TVL means more Nodes per BNB, Lower TVL means less Nodes.
This creates level playing field so no user can be late.
There is NO calculator available to work this out.

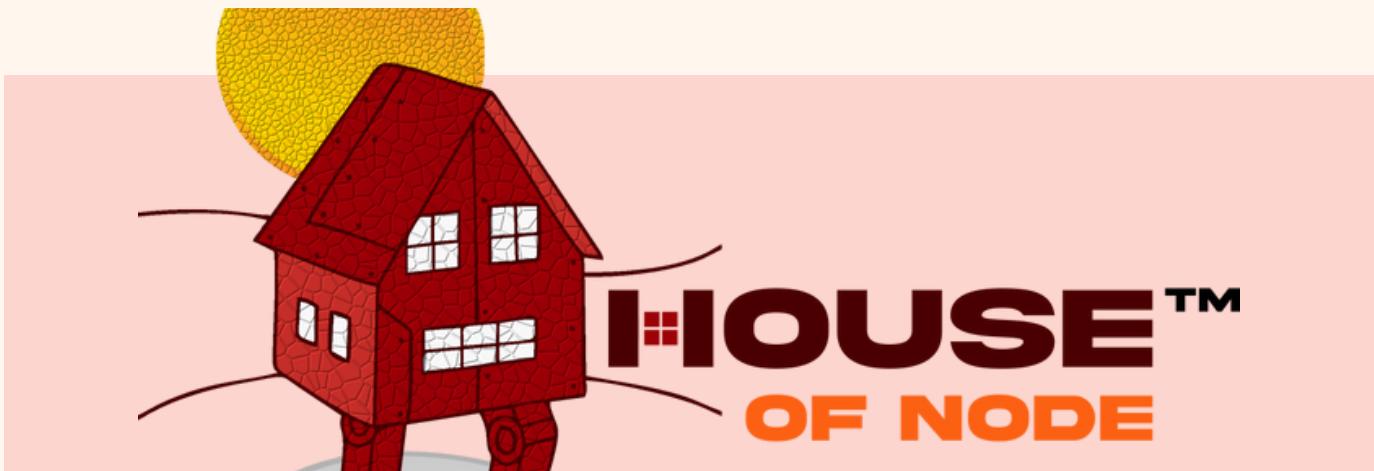

DISCORD

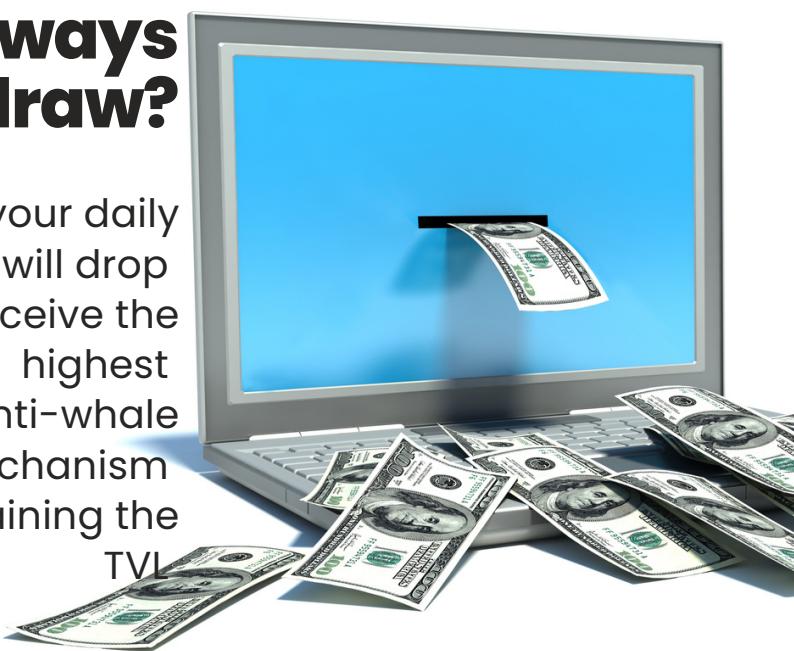

Follow

What happens if i always withdraw?

If you always withdraw, your daily percentage will drop drastically and you will not receive the highest daily returns. This is the anti-whale mechanism that prevents a whale from draining the TVL

Is reconnecting more often better, 2 or 3 times a day?

Re-connecting is the same as compounding, so essentially yes. You will need to pay standard BSC gas fees for everytime to connect to more nodes.

Reminder

It is better to reconnect to more nodes than withdrawing/disconnecting as this gives you a higher advantage over others in the server.

It is 6 compounding days. In those 6 days you can connect to more nodes as many times desired. It is just compounding faster.

EST. 2022

HYPER

Runs in the nodes

What are 'NODES'?

Nodes are the servers that are powered with BNB
and they

work to get you your rewards. Re-connect to
connect to more servers

Can I get my initial
deposit back?

Hypernode is a locked rewards pool, so no.
You get your initial back over time through the
daily 15% rewards.

Referral's
percentage

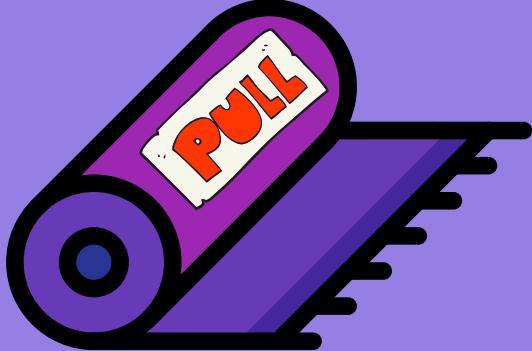

Referral percentage is 14% of your
referral's deposit. 1 BNB deposit equals 0.14 BNB

What are Dev fees?

There is 2% dev fee taken upon ALL deposits and
withdrawn from the mine.

Standard BSC network gas fees are required for
EVERY transaction made deposits, withdraws and
reconnecting! Common issue when reconnecting is no gas
fees!

What's the roadmap long term?

Hypernodes aims to become the largest Dapp on the BSC Smart Chain. NODES will integrate with large swaps such as Pancakeswap in the near future. Nodes would soon release token and airdrop to all IN THE NODE FAMILY

Can contracts be altered

No, the contract is immutable and cannot be changed. Wallets cannot be blacklisted

Minimum Deposit

0.01 bnb minimum deposit requirements.

RUGPULL?

The contract is immutable and fully audited by Haze Security. Therefore cannot be changed or altered in any way shape or form.

What is minimum re-connection rates?

There is no minimum re-connection requirements.

You will always be charged standard BSC BEP20 gas fees for every interaction with the contract

ANTI WHALE

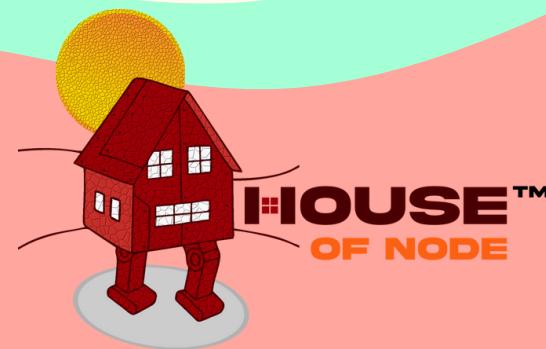

The contract has an in-built anti-whale mechanism.

This works as follows; User 1 re-connects 6:1 gets highest daily

percentage in that 24 hour period. User 2 does 5:2 gets a lower percentage. User 3 does 4:3 gets lower percentage again. This happens all the way until the user who eats continually rewards will drop to 0.5% per 24 hour period.

This

is to prevent 1 user draining the TVL, creating sustainability

IS THIS SUSTAINABLE?

YES, AS LONG AS THERE IS TVL IN THE CONTRACT THEN THERE WILL ALWAYS BE REWARDS. THE HUNGRY PEOPLE WHO EAT TOO MUCH GET PUNISHED AND GET LOWER AND LOWER REWARDS. IT WILL LAST A LONG TIME THE HIGHER THE TVL IS

WILL WE REGRET?

NO, THE 'NODES' AMOUNT WILL NOT CHANGE. IF YOU MAKE A NEW DEPOSIT OR RE-CONNECT THE AMOUNT WILL INCREASE BUT NOT WHEN YOU EAT (TAKE REWARDS). THE 'NODES' ARE LESS EFFICIENT OVER TIME IF YOU WITHDRAW TO MUCH

BE STRATEGIC!

We recommend the tried and tested method as it is written in the contract.

Re-invest 6 days and withdraw 1 day a week. It will compound your investment and receive your initial back in 3-5 weeks

Is it too late to invest?

No, the contract is written to provide an optimal entry for any and all users, new or old. This is the reason the nodes per BNB amount changes frequently with TVL fluctuation to provide an even playing field for any new user coming to mine and not giving the first user/s a headstart

Let's go make something awesome!

****DISCLAIMER****

WE GUARANTEE UP TO 14% EXCEPT WHEN YOU WITHDRAW CONTINUOUSLY.
DO NOT INVEST MORE THAN YOU CAN AFFORD TO LOSE.

NO PAIN
NO GAIN
